UltramapGlobal
Data Services

UltramapGlobal is Dedicated to the Protection of The World's Most Important Subsea Cables.

A Unique Resource Containing Some of the Most Comprehensive Marine Vessel Behavioural Analysis Data in the World.

Nobody has been gathering and storing such data for as long, in such volume and as quickly as UltramapGlobal.

Increasingly, organisations both client and non-client want to access UltramapGlobal's extensive vessel behaviour and analysis data, as captured by our AssetMonitor® software.

Over a decade of archived data helps us (and you) to understand the causes and perpetrators of cable strikes and identify hazard hot-spots, trends and common vessel behaviour, busy shipping route patterns, heavily populated fishing areas and more.

Information can be analysed to pre-emptively predict future problems based on volume of ocean traffic or of subsea activity such as trawling.

In response to your specific requirements, the UltramapGlobal Data Services team produce data extracts, statistical and geographical reports as required and can also provide temporary access to AssetMonitor® as part of any study.

UltramapGlobal Data Services is uniquely valuable to clients for two reasons

Reason 1.

Nobody has collected and has access to more marine data, for longer, than we do, in relation to the protection of subsea cables.

When it comes to being informed about any issue whatsoever relating to the protection of subsea cables – UltramapGlobal and its data rich AssetMonitor® software enable more confident decision making than anyone.

Reason 2.

The world's most used Specialist Subsea Cable Monitoring Software is AssetMonitor®.

This huge breadth of usage means that UltramapGlobal gathers more data and at a faster pace than anyone. So we learn in more depth and more quickly than anybody else. And because we deal with almost every other AIS data supplier in the world, if ever there are gaps in our knowledge, we access additional insights from our global network.

If you are a cable owner, or if you are having cables installed, UltramapGlobal and its AssetMonitor® Software are the brands offering cable protection in which the world can be most confident.

Explore how we can help you personally. Please call Jeff Taylor, Head of Business Development on +44(0)7796 888910, email jeff.taylor@ultramapglobal.com or visit UltramapGlobal.com.
